DEFLECTION

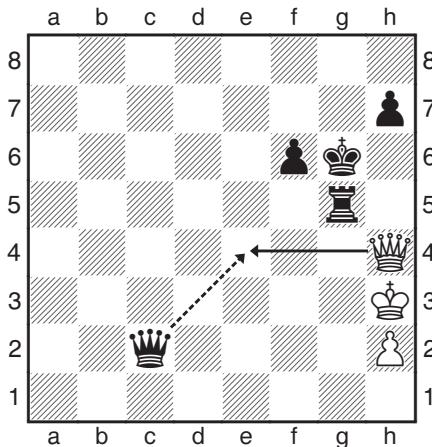

**TRICKY  
TACTIC****29****Kamikaze Queen and Rampant Rook***It's chess, Jim, but not as we know it*

You are now entering the twilight zone, where the normal laws of chess are suspended. Around you, Kamikaze Queens and Rampant Rooks embark on suicidal missions with abandon, and draws occur despite a huge material disparity between the players.

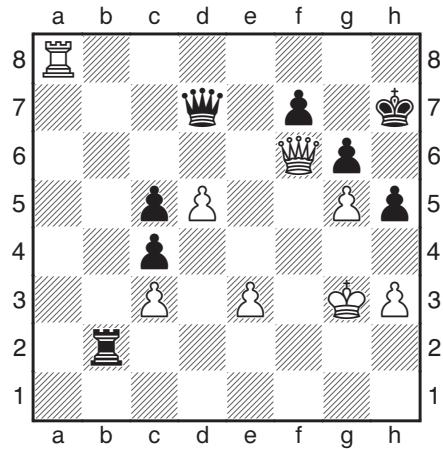

It must be admitted that positions where both a rook and a queen are sacrificed to force stalemate are exceptional. Rarer still are those remarkable positions where two rooks and a queen are given up. But what this motif lacks in quantity, it makes up for in quality. These combinations are always stunning.

**Typical Position for a Kamikaze Queen & Rook****1a) White moves**

On 1  $\mathbb{Q}g7+$  (heading for 1... $\mathbb{Q}xg7$  2  $\mathbb{R}xf6+! \mathbb{Q}xf6$  stalemate) Black declines the rook with 1... $\mathbb{Q}h5$ , but White re-sacrifices: 2  $\mathbb{Q}xg5+$   $\mathbb{Q}xg5$  3  $\mathbb{R}h4+$   $\mathbb{Q}g6$  (1b).

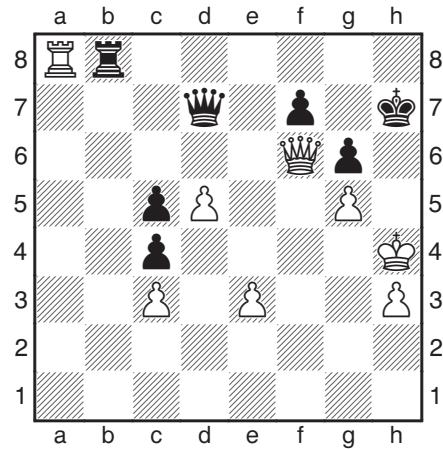

**1b) White moves**

An altered stalemate structure – White's king now has the flight square h4 – is often disastrous. But with 4  $\mathbb{Q}e4+! \mathbb{R}xe4$  the draw is achieved.

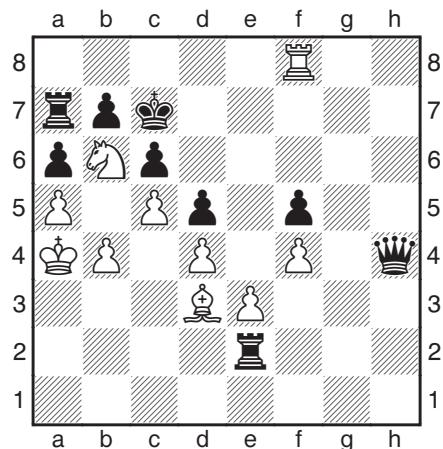

### 2a) Black moves

Facing mate threats, Black's amazing defence involves sacrificing first a pawn and then his rook: 1...h4+! 2 ♔xh4 ♕b8! (2b).

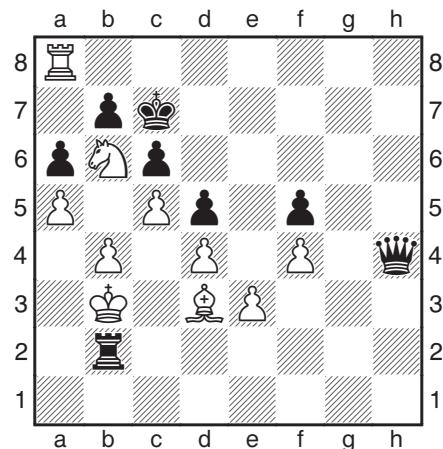

### 2b) White moves

On 3 ♕xb8 Black's queen is also thrown into the pot. By 3...♕xh3+ (also 3...♕g4+) 4 ♔xh3 Black achieves the desired draw by stalemate.

### 3a) Black moves

Black lost this game, believing checkmate on c8 was unstoppable. The missed defence was 1...♕a8!! 2 ♕xa8 (2 ♔xa8+ 3 ♔d7) 2...♕a2+ 3 ♔b3 ♕b2+ (3b).

### 3b) White moves

On 4 ♔xb2 ♕f2+ the two sacrificed rooks are followed by a kamikaze queen: 5 ♔b3 ♕b2+ 6 ♔xb2 stalemate. Out of this world...
